

# QUBE POWER MAX PORTABLE LIGHT TOWER

QPM-2H-AU

## Features

|                                                                                                                            |
|----------------------------------------------------------------------------------------------------------------------------|
| Mitsubishi L2E Engine, 2 cylinder, 4 stroke, water cooled, 4.4kw at 1500rpm                                                |
| NSM (Italy) Brushless alternator, 3.5kW @ 1500rpm (230VAC single phase @50Hz)                                              |
| 4 x high lumen output 400W LED with special asymmetric lenses.<br>40/60 degrees. LED drivers are Meanwell and CE certified |
| 210,000 lumens / 4800m2                                                                                                    |
| Deepsea 4520 Genset Controller                                                                                             |
| Electric or manual light bar tilt                                                                                          |
| 350° Mast rotation                                                                                                         |
| Each LED Light can also be individually angled before raising mast                                                         |
| 7 metres 12v Hydraulic or Manual winch mast                                                                                |
| Heavy Duty 890CCA Battery                                                                                                  |
| 110% Bunding                                                                                                               |
| 100 liters (DIESEL)                                                                                                        |
| 58dB at 7 metres                                                                                                           |
| ALKO torsion suspension or optional Leaf spring                                                                            |
| ALKO Drawbar with 50mm ball hitch and inertial braking                                                                     |
| 4 x Extendable heavy duty stabilizer outriggers                                                                            |
| Powder coated with PP powder that is UV and corrosion resistant with many colour options                                   |
| LED Tail lights and license plate light, 7pin flat plug                                                                    |
| 13" Sunraysia Rims with ADR approved light truck tyres                                                                     |
| Centre point lifting                                                                                                       |
| Forklift pockets on all 4 sides                                                                                            |
| Trailer has full ADR approval                                                                                              |
| Olikara's uniquely engineered canopy with raise and side opening doors for complete access                                 |
| <b>Compact and Lightweight</b>                                                                                             |
| Dimensions (Travel) LxWxH(metres) - 2.4 x 1.18 x 2.3                                                                       |
| Dimensions (Operational) LxWxH(metres) - 2.4 x 2.74 x 7                                                                    |
| Weight - 950kg                                                                                                             |
| Optional - L3E Mitsubishi Engine with 6kva alternator for extra power                                                      |
| Optional - DC Voltage powered alternator                                                                                   |

**\*\*Light Tower can be customised to suit your specifications\*\***

24 months/2000hrs on Mitsubishi engines, 12 months on NSM alternators and 12 months on structure.
